Bolt Cutters

High Tensile, Tubular Handles

High tensile - for cutting hard materials up to 50HRC. Centre cut, strap adjusted bolt cutters with lightweight tubular handles that do not compromise strength – every pound of force applied is amplified to produce 80lbs (36kg) of force between the jaws. To maximize safety, the built in stops will yield rather than break, while the drop forged jaws are machined to precise specifications for a resilient body and rigid cutting edge.

End Cut Bolt Cutter

Pincer movement makes the bolt cutter ideal for cutting in restricted areas or where a side cut is difficult, eg. when cutting off bolt heads. Jaws are drop forged and machined to precise specifications for a resilient body and rigid cutting edge. Handles are solid forged and incorporate safety stops that will yield rather than break.
